It is the same setup as before – they will be outside unless there is inclement weather, and then they will be in the gym.

Jason Allen, Public Works Parks Superintendent

Jason gave a little background on himself as he just started with the City 4 weeks ago. He has spoken to each of his employees, and feels fortunate to have 100 years of tenured staff. Jason explained his philosophy on how he likes to run things and looks forward to working with the parks department.

So far, the Civic Centre park has been a focus since it was already in the works for the dedication. Most is done, but rain has held it up a bit. Irrigation is fully operational, germination is good with a lot of grass coming up. The fountain has been turned on and works great with over 60 programs it can run.

We are moving forward, and keeping things mowed, trimmed and seeing to citizens requests. This city has a lot of landscaping so hard to keep up with it.

At last night council meeting, a larger mower was approved, which will be more efficient.

Some landscaping and cleaning up has been done at city complexes, and other areas that need tending too.

I have also met with Scott and Denny at the Recreation Dept., getting to know them, how they work, and how they operate so we can work well together.

Stopak mentioned that at the Council meeting the night before, that Waters Edge Aquatics have been approved to be a consultant on the process of a new pool, and that there would be community engagement meetings also.
